I work between different spreadsheets, and I like to have one main workbook that links to certain cells in other workbooks. For example, I will do a statement of business activities workbook that has all the business expenses listed, and then I will have individual workbooks for each expense account.

Question 7. Differentiate between the terms - 'Ion' & 'radical' with suitable examples. Answer: Ion "is an atom or a group of atoms carrying a positive or negative charge due to loss or gain of electrons." e.g. cation Na<sup>+</sup> and Cl<sup>-</sup> is anion. Radical "is group of atoms of elements that behaves like a single unit & show valency."
