General Discussion. Although pars planitis is generally benign, there can be significant vision loss in extreme cases. It is an immunological disorder of the eye characterized by inflammation of a part of the uvea, the layer of tissue between the sclera and the retina, the membranes protecting the eyeball.

Pars Planitis - NORO (National Organization for Rare ...

Chorioretinitis is an inflammation of the choroid (thin pigmented vascular coat of the eye) and retina of the eye. It is a form of posterior uveitis. If only the choroid is inflamed, not the retina, the condition is termed choroiditis. The ophthalmologist's goal in treating these potentially blinding conditions is to eliminate the inflammation and minimize the potential risk of therapy to the ...

Natural remedies for macular degeneration - 15 at-home tips

As hyperopia is the result of the visual image being focused behind the retina, it has two main causes: Low converging power of eye lens because of weak action of ciliary muscles; Abnormal shape of the cornea; Far-sightedness is often present from birth, but children have a very flexible eye lens, which helps to compensate. In rare instances hyperopia can be due to diabetes, and problems with ...

Anisocoria is a condition characterized by unequal pupil sizes. It is a relatively common condition, and causes vary from benign physiologic anisocoria to potentially life-threatening emergencies. Therefore thorough clinical evaluation is important for the appropriate diagnosis and management of the underlying cause.
